LAB SAFETY

We take care of ourselves, each other and our materials.

01 **Wear safety goggles**
Put them on before any experiment begins.

02 **Tie back hair and loose clothing**
Keep sleeves, jewelry and hood strings secured.

03 **No food or drink at the lab table**
Keep the workspace clear for the investigation.

04 **Follow directions before you start**
Wait for your teacher before handling materials.

05 **Report spills and broken glass**
Tell an adult right away. Do not clean it up alone.

06 **Wash your hands when you finish**
Leave the lab as clean as you found it.

07 **[Add your class rule]**
[Add a short reminder.]

Follow your school or district lab safety policy.
